Frontier Regions and Opportunities - Multi-Client Seismic Data and Basin Entry Decisions

Katja Akentieva
Managing Director
TGS Canada

Summary

This presentation brings an international perspective on the impact of the regional, multi-client seismic surveys ongoing in offshore Newfoundland & Labrador and the recent oil discoveries in the Flemish Pass. How high-quality data, regular licensing rounds, and recent discoveries assist new E&P (exploration and production) entrants in making decisions about where to hunt for the next big petroleum opportunity in frontier regions.
